Introducing Soundstyle

A smarter, more stylish way to bring peace and comfort into your home.

Life at home is full of sound – conversation, laughter, music, movement. But too much noise can overwhelm a space. That's where Soundstyle steps in. Thoughtfully designed acoustic panels that don't just quiet the room but elevate it.

Created for those who appreciate the balance of form and function, Soundstyle blends sophisticated design with proven acoustic performance. We've crafted a collection of three modern designs in timeless neutral tones, versatile enough to complement your home today, and tomorrow.

● Wisp in Colourway Chiffon

The difference you'll experience

Create quieter, calmer living spaces
Acoustic panels reduce echo and help control noise within a space, making open-plan areas feel more peaceful, especially when multiple people are home.

Improve conversations and TV clarity
In media rooms or lounges, reducing reverberation means better sound quality, dialogue is clearer, and volume doesn't need to be cranked up.

Help with focus and productivity
In home offices, acoustic panels minimise background noise, helping create a more focused, professional environment for work or study

Control sound in multi-generational homes
For families with children, teens, or elderly parents, acoustic solutions can help manage competing noise needs across different spaces.

● Lines in colourway Juniper

● Arches in colourway Pearl

Superior Acoustics
Cut echo and reduce unwanted noise by up to 21%* for a calmer, more livable space

Sustainably Made
Each panel repurposed 528 plastic bottles, crafted from 60% post-consumer PET, and proudly carries Climate Active certification for a net-zero carbon footprint

Australian Made
Licensed by Australian Made Campaign Limited to use the Australian Made logo

Sensitive Choice
Certified by the National Asthma Council Australia

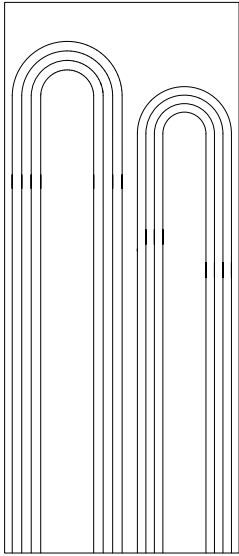

* Acoustic test results, NRC 0.21 (Noise Reduction Coefficient)

Our patterns

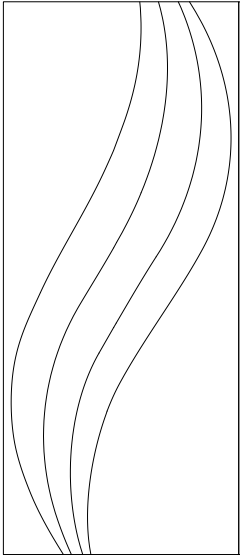

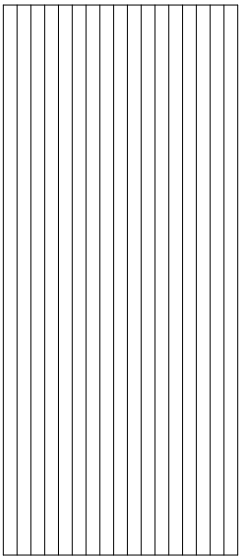

Our acoustic wall panels come in three understated designs. Each panel is precision cut to ensure a flawless finish, creating clean lines and a refined aesthetic that elevates your interiors while enhancing sound quality.

● Arches in colourway Pearl

● Lines in colourway Cloud

● Wisp in colourway Juniper

Stylish and Durable

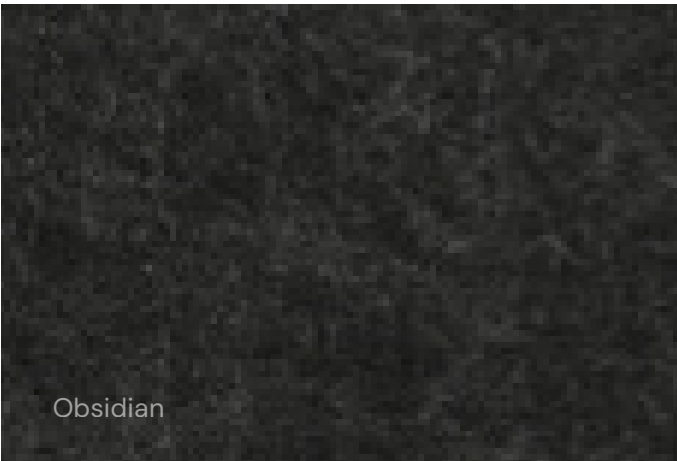

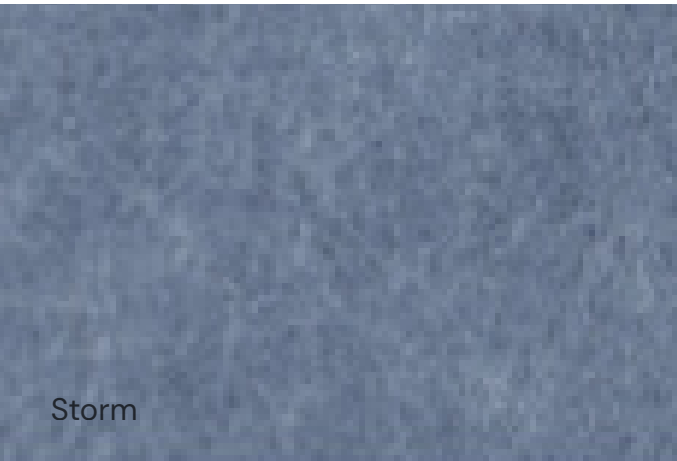

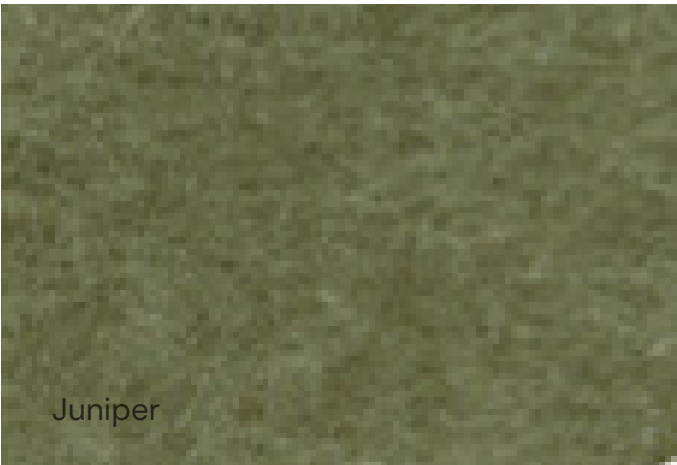

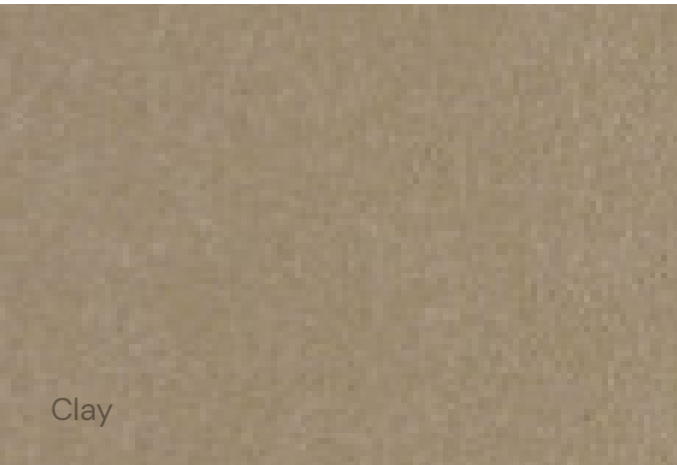

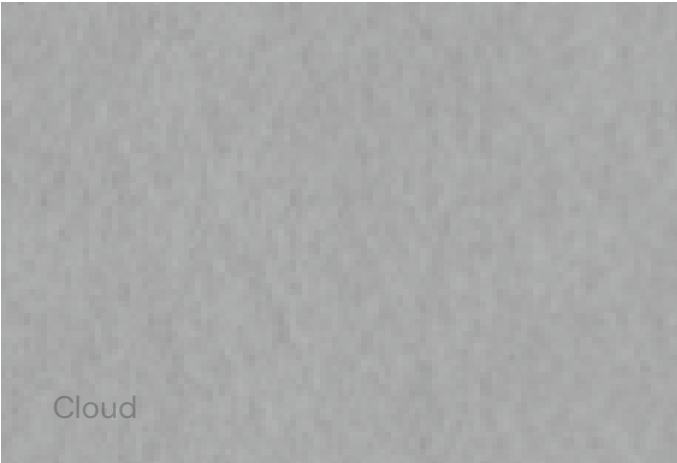

Lightweight and versatile across living rooms, bedrooms, offices, and media zones.

● Wisp in colourway Storm

Our colours

This thoughtfully curated colour palette is designed to help you create spaces that feel both stylish and personal.

● Lines in colourway Cashmere

Create your style

Soundstyle panels are designed floor-to-ceiling but are easy to cut down for half-wall installations, providing acoustic comfort that fits perfectly with your space, whether you're after a subtle accent or a thoughtfully designed feature.
